

SECURITY AUDIT

Cyber-terrorism - Dick Clarke, special advisor to the president on cyberspace security:

“Cyberspace **security will depend primarily on the private sector** and will play a vital role in raising the level of security in the U.S.”.

“We’re never going to be able to tell people in advance on a consistent basis who’s going to attack what, when and how - so **let’s worry about the Vulnerabilities, not the threats.**”

Clarke asserted that private-sector organizations **don’t need to wait** for the intelligence services to find attackers.

“**Document** your vulnerability analysis, **rank** the vulnerabilities, and **start solving** the **problems** step by step.”

When was your last medical **physical**? You are tested for **KNOWN** diseases; Your physician presents you with the **documented results**; the doctor **prescribes treatment** and then he continues to **monitor your health condition** for improvement or...

INTEK and Our *Base Line Information Security Service is your **Company Security Physician.*** Just like your physician we will test your company security for **known vulnerabilities, report** and document results; **prescribe** the treatment (**Fixes**) and **monitor** your company security health over the long term; **BLISS or Peace of Mind! – CALL us and get your company security health check, your security physical – Don’t delay! CALL TODAY!**

Is your company Safe? Can you prove it? BLISS Can!
